Special Instructions for Completing this Form

Schuler Cabinetry offers an array of standard and custom-quoted options for wood appliance panels to complete your kitchen order. To ensure that you receive the product as you intended, please carefully complete all five steps of this form and fax the form to your Customer Care Representative or Custom Quote Department if applicable.

Step 1 - Determine whether your panel is for a compactor, dishwasher or refrigerator.
Step 2 - Specify one of the five types of panels that Schuler offers.
Step 3 - Select one of our standard panel configurations, if applicable.
Step 4 - Provide clear and specific measurements for each panel you select.
Step 5 - Provide an illustration of the desired configuration, if applicable.

Notes to remember:

(a) The standard center reveal is always 1/8" and the smallest possible reveal is 1/16" inch.
 (b) The factory is not able to rout for handle scoops on appliance panels. Handle reveals must be considered in the dimensions listed in Step 4.
 (c) If you order a 1/4" backer panel with a 1/8" spacer and a door/drawer front applied, please be aware that the spacer panel will automatically be reduced on all 4 sides by 5/16" less than the backer panel. If you need the spacer to be reduced by a dimension other than the standard 5/16", please add that dimension to the chart in Step 4.
