- Dimensional engineered material
- Time-worn wood look

**Gloss Thermofoil**
- Reflective engineered material
- Contemporary look

**MDF**
- Engineered wood
- Perfect for paint application
- Resistant to warping, expansion and contraction
Warm Wood Collections

The unmatched beauty and charm of wood stems from its distinct patterns. Capture the unique character of nature with a warm wood finish collection from Schuler.

Stain
Transparent stains accent the natural beauty and distinctive grain of your cabinets. Our stains are protected by an oven-cured top coat that provides a superior seal.

Glaze and Highlight
Glaze is sprayed over base stain, then hand-rubbed to create a patina enhancing both color and character. Additional hand-brushed detailing creates definition for the impression of an aged piece of furniture.

Antique Distressing Collection
Antique Distressing is a finish created by lightly distressing wood for a subtle worn appearance. Characteristics include sanded corners and profiles of doors and drawer fronts, as well as small dings and dents.

Legacy Distressing Collection
Legacy Distressing is a finish created by physically distressing wood for an aged appearance. Characteristics include sanded corners and profiles, small dings and dents, rasping, worm holes, chisel marks and knife splits. In addition, a glazed brush spatter is applied.

Appaloosa Collection
Appaloosa includes a semi-transparent warm stain, Legacy Distressing and dark glaze hang-up. In addition, spray spatter and brushed glaze accents are added to enhance the depth of the finish.
COLOR COLLECTIONS

The perfect color transforms a room and speaks volumes, whether a bold statement throughout or a simple pop of color. Create a mood with the color finish collections from Schuler.

Classic Paint
A lustrous enamel finish which provides solid coverage and a smooth satin finish.

Paint with Highlight
A hand-brushed accent glaze is applied to detailed areas of the door. This process enhances the detail of the door without changing the overall color and appearance of the base paint.

Paint with Glaze and Highlight
An accent glaze is sprayed over the sealed enamel paint then hand-wiped to create a patina. This process alters the overall color and appearance of the base paint. Door details receive additional hand-brushed accents for more definition. These attributes combine to create the impression of aged furniture.

Paint with Glaze and Highlight and Heirloom Distressing
An enamel base coat is accented with sprayed glaze, hand-brushed highlight, random distressing and sand through, which creates the wear and patina of heirloom furniture.

Sheer Colors
Color washed semi-transparent stain. Slight visibility to the wood character and tone are common, and are especially noticeable on lighter tones.

Sheer Colors with Dry Brush
Color washed semi-transparent stain with a dry brush glaze accent. Slight visibility to the wood character and tone are common, and are especially noticeable on lighter tones.
Superior Finish

State-of-the-art finish process includes artisan care

Skilled application

- Hand-sanding prepares all of our wood products for the best possible stain absorption and a smooth consistent feel.
- Stains are hand-wiped which draws out the natural beauty of the wood grain for a rich final finish.

Clear, protective varnish topcoat

- A catalyzed conversion professional grade varnish includes a sealer topcoat to lock in color and is more durable than lacquer.
- Showcases the beauty of the wood, it’s grain and adds depth to the finish.
- Protects against wear due to regular cleaning and common household chemicals.
- Clear as pure water, the unique topcoat is more resistant to yellowing from age or UV rays when compared to other topcoats.

Hand-crafted finish options

- **Glaze and Highlight** is a multi-step process that adds patina and dimension to the selected stain or paint enhancing the final finish.
- **Highlight** includes hand-brushed glaze detailing on classic paint designed to complement the details of the door style.
- **Heirloom** paints create the look of wear and patina by combining subtle distressing, with sand-through and glaze and highlight.
- Our **Distressed** stain-based finishes include a variety of hand-applied elements combined with glaze and highlight for a naturally aged or heirloom look.

Paint

- Premium solvent-based enamel paints that are oven cured.
- Provides best protection against common chemicals, oils and moisture.
- Easy-to-clean satin finish.

Distressing techniques are artfully applied by hand, giving cabinets an aged or heirloom look. Premium, solvent-based enamel paints are baked on, protecting the wood from common chemicals, oils and moisture.
Schuler is a certified participant in the Kitchen Cabinet Manufacturers Association (KCMA) Environmental Stewardship Program (ESP).

As a member of the U.S. Green Building Council (USGBC), some products may qualify for LEED® certification points for recycled content and regional materials. Certification points are awarded based on specific projects. Refer to www.usgbc.org for details.

Schulers’ multi-step finishes are formulated for superior resistance to moisture, household chemicals and solvents. Finishes exceed KCMA specifications with a 9.8 out of 10 resistance rating in performance testing against the materials illustrated below.

**Superior performance and resistance to:**

<table>
